

EEPROM Programming Kit Part Number: TP120510

Total Phase has bundled together a complete set of development tools and accessories that allow developers to erase, program, and verify serial EEPROMs.

Thanks to Total Phase's free Flash Center™ Software developers can quickly and easily program devices either stand-alone or in-system.

With this kit, developers can:

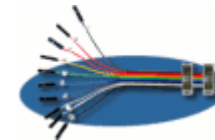

- Program I2C EEPROMs and SPI EEPROMs (DIP-8, SOIC-8, and TSSOP-8).
- Program devices in-system or stand-alone.
- Gang-program multiple devices in parallel.

The Programming Kit includes:

- (1) Aardvark I2C/SPI Host Adapter
- (1) 10-Pin Split Cables
- (1) EEPROM Socket Board
- (1) 6 foot USB A->B cables
- Software CD
 - Windows USB Drivers
 - Linux USB Hot Plug Configuration files
 - GUI Software
 - Software API
 - Example Code
 - Datasheets
 - Documentation
