

EJ-WRITER flash writer

compact & USB-powered

high-speed Flash downloading

over 300 FLASH devices supported

software application debugging

product testing & maintenance

EJ-Writer was the first ROM writer that has the ability to write directly into Flash ROM (already installed on the target board) via the JTAG port . The EJ-Writer is less than the size of 2 business cards and is powered by USB bus (no AC adapter required). With just a touch of a button, you can start auto-script execution without a command from your computer. This is perfect for auto-verification of targets on mass production or for updating new versions, both in the field or on the manufacturing line.

- Special writer for Flash memory
- Powered by USB bus (no AC adapter needed)
- Small size(86mm X 100mm X 23mm)
- Automatic script execution via the WRITE button
- Useful for field maintenance AND/OR for automatic writing / upgrading in mass production
- Writer software is included
(Windows XP/ME/2000/NT/98 platforms)
- USB interface for high-speed communication with host computer
