

**Product name :** SF200 Engineering  
**Model name :** SF200

**Description :**

The SF200 programmer has been designed to offer high reliability, flexibility and performance for a low cost. The serial flash can be programmed on the programmer's socket. The programmer is built in with DIP socket allowing to program DIP-packaged serial flash without additional adaptors. Serial flash in other packages require additional socket adaptors.

**Features :**

- USB full speed support to control the serial flash memory through a friendly and powerful tool.

High performance(tested and measured with software version 2.0.37.2 and from a single source of serial flash memory supplier):

USB Mode					
Density	8Mb	16Mb	32Mb	64Mb	128Mb
Program	7.28s	13.09s	28.01s	52.4s	74.01s
Verify	2.57s	4.64s	8.08s	17.09s	33.78s
Auto(Program+Verify)	8s	14s	37s	70s	108s

## Hardware :

 DIP Socket: to plug in DIP-packaged serial flash directly or to plug the socket adaptors which fits the target serial flash memory packages

## Contents :

 USB cable  
 1 Programmer  
 CDROM with Software, specifications and user manual.

## Option Purchase :

 SO8W to DIP Adaptor  
 SO8N to DIP Adaptor  
 MLP/MLF 5x6 to DIP Adaptor  
 MLP/MLF 6x8 to DIP Adaptor  
 TSSOP8 to DIP Adaptor
