

Test Boards

I2C/SPI Activity Board 🌿 **Part Number: TP240310**

The I2C/SPI Activity Board is the perfect tool for both the expert and novice embedded systems developer. Novices can learn the mechanics of the I2C and SPI protocols. Experts can use the activity board as a sanity check to debug their systems against known working slave devices.

High-Speed SPI Flash Demo Board 🌿 **Part Number: TP280210**

The High-Speed SPI Flash Demo Board is a useful tool for developers working with high-speed SPI flash memory. This board comes with a known good slave memory device that is capable of communicating at 50 MHz.

Flash Socket Board 🌿 **Part Number: TP240510**

The Flash Socket Board allows a developer to flash and burn stand-alone I2C- or SPI-based memory chips by using either an Aardvark I2C/SPI Host Adapter or a Cheetah SPI Host Adapter as an interface
